

## Single Sign-on

Participant engagement is a key element to a successful equity plan. Certent Single Sign-on automates the Participant Portal login process and provides your employees the benefit of entering their credentials just one time. Once your participants have logged into either your company's network or your benefits platform, Certent validates those credentials and generates a new window displaying the home page of the Certent Participant Portal.

Certent Single Sign-on is SAML (Security Assertion Markup Language) 2.0 compliant, allowing us to exchange authentication and authorization data in the most secure way possible. Empower your participants by making it simple to access equity award information through Single Sign-on.

### FROM YOUR COMPANY NETWORK

This functionality allows you to integrate the Certent Participant Portal right into your company's intranet or benefits platform and:

- 💡 Encourage greater participant engagement and knowledge
- ★ Enhance the participant experience
- 📊 Eliminate barriers to finding essential participant information
- 🔍 Allow participants to view a snapshot of their equity awards with one set of credentials
- 📅 Anticipate and react to any upcoming tax events or grant communications
- 📝 Enroll in an employee stock purchase plan
